Forecast for Wednesday 14 Sep 2022

Weather: Early mist and shallow valley fog clearing during the first part of the morning. A largely fine and dry day follows, but cloud will push in from the north and affect northern slopes. Any sunny spells will therefore be most prolonged in southern parts of the park. Staying dry into the evening with a mixture of variable cloud and clear spells.

Chance of cloud-free hill tops above 800m: 70% but 40% in the north until early afternoon.

Low Cloud and visibility: Periods of cloud above 600-700m during the morning, this locally persistent over the Carneddau and Glyders at first. Higher cloud bases further south, with cloud becoming patchier above 700-800m for the afternoon. Largely very good visibilities but locally very poor in cloud and any early valley fog.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

A largely fine day to be out on the hills.

Forecast for Thursday 15 Sep 2022

Weather: Isolated valley mist and fog patches clearing readily after dawn. A mixture of cloudy periods and occasional sunny spells throughout the day, these most frequent in southern parts of the park. The odd light shower is possible but it will be largely dry by day and into the evening.

Maximum wind: 15-18mph northwesterly winds on the summits.

Chance of cloud-free hill tops above 800m: Generally 80%, but 60% in the north during the morning.

Low Cloud and visibility: Patchy cloud around 600m affecting northern slopes in the morning. This becoming more isolated in the afternoon, with most bases above the summits. Visibility predominantly very good, but poor in cloud shrouding the summits and in any early mist and fog.

Temperature: **Valleys:** Plus 10 Celsius, rising to plus 17 Celsius.
At 800m: Plus 5 Celsius, rising to plus 7 Celsius.
Freezing level: Above the summits.
